

LC-350

High Speed Intelligent Laser Die Cutting System

* Appearance and dimension may change due to upgrading

Main Applications

PP

BOPP

Synthetic Paper

PET

Glossy Paper

Matte Paper

Silver Polyester

Reflective Film

Double Sided Tape

Art Paper

Card Paper

Coated Paper

Equipment Features

3D Dynamic Galvo cut

automatic processing

easy operation

■ Professional roll to roll working platform, digital workflow streamlines operations; Highly efficient and flexible, significantly increasing processing efficiency.

■ Modular custom design. According to processing requirements, various laser types and options for each unit function module are available.

■ Eliminate the cost of mechanical tooling such as traditional knife dies. Easy to operate, one person can operate, effectively reducing labor costs.

■ High quality, high precision, more stable, not limited by the complexity of graphics.

LC-230

Economical Intelligent Laser Die Cutting System

Modular Custom Design

Goldenlaser's high-speed intelligent laser die-cutting system adopts a multi-module, customized and all-in-one design concept. It can be equipped with various optional modules according to your processing needs, fully satisfying your individual customization needs.
